What is Term Deposit?

A deposit held at a financial institution that has a fixed term. These are generally mid to long term with maturities ranging anywhere from months to a few years.

When a term deposit is purchased, the lender (the customer) understands that the money can only be withdrawn after the term has ended. Term deposits are an extremely safe investment and are therefore very appealing to conservative, low-risk investors. By having the money tied up

you'll generally get a higher rate with a term deposit compared with a demand deposit. This brochure documents what Kontiki Finance's fees and charges are.

Important Customer Notice
